

CONSTRUCTION NOTICE

February 18, 2016

5th Ave Transit Contraflow Lane Expansion: Parking removal starts Friday, February 19

Work to extend a Bus Only lane continues this weekend as crews remove parking

In conjunction with the Yesler Bridge Rehabilitation Project, the Seattle Department of Transportation (SDOT) will extend the existing 5th Ave transit contraflow lane by two blocks between Terrace and S Washington streets (green arrow on the map).

Last weekend, crews removed existing road paint on 5th Ave. On Friday, February 19, crews will remove parking on the east and west side of 5th Ave between S Washington and Terrace streets. Depending on the weather, crews will also paint new road markings and adjust traffic signals this weekend to prepare for the contraflow lane opening (tentatively March 1).

As work occurs, flaggers will safely direct cars, pedestrians, and cyclists during periodic lane closures.

Parking once the Bus Only lane is installed

When crews finish work, there will no longer be any parking on the east side of 5th Ave between Terrace and S Washington streets. Parking currently on the west side of 5th Ave will move northward to the intersection of 5th Ave and Terrace St. New parking will be added on the west side of 5th Ave between Jefferson and Terrace streets. This new parking will be a mix of two hour limits and specified loading zones.

Other alternate parking includes:

- On-street parking on Terrace St
- Off-street parking lots on Terrace Street and further south on 5th Ave

Yesler Bridge Rehabilitation Project

We will be rehabilitating the Yesler Way Bridge, located at the intersection of Yesler Way and Terrace St over 4th Ave. Construction is anticipated to start spring 2016.

WHAT TO EXPECT DURING CONSTRUCTION

- Typical working hours between 7 AM and 6 PM
- 5th Ave will remain open during construction, but expect periodic lane closures
- Permanent parking removal on the east and west side of 5th Ave between Terrace and S Washington streets
- Access to businesses and residences maintained
